

VMC Pro-5 — Operation & Maintenance Manual

Overview

VMC Pro-5 vertical machining center. High-speed machining up to 18000 RPM. Ideal for aluminum and steel components.

Safety

Chip conveyor must be clear before start. Fire suppression optional module installed in Zone B.

Coolant System

Maintain 7% coolant concentration. Replace filter every 500 operating hours. Tank capacity: 200 liters.

Tool Change

Automatic tool changer (ATC) cycle time: 2.1 seconds. Max tool diameter: 80 mm, length 300 mm.

Efficiency Tips

Use high-pressure coolant for deep cavity work. Optimal efficiency reported at 88% when running 2-shift operation.
